

Presentation

On 9 months of 2010 of Forest Plantation activities (Indicator 25,000 ha/year of Degraded Forest)

The Technical Working Group on Forestry and Environment
The 27th meeting on 1st October 2010

Prepared by Ma Sok Tha
Director of Forest Plantation and
Private Forest Development

1- Planting Tree Implementation

1-Purpose:

- The Program of tree plantation is to stimulate tree planting and Forest rehabilitation in accordance with rectangular strategy of government (phase II year 2008). The rectangular has enhanced forestry sector, which Angle 4 has established the forestry reform to ensure sustainable forestry management and the use of forests to improve the livelihoods of people living in rural areas and to contribute to economic growth.
- Reforestation on degraded forest land is implemented every year through state budget and the contribution from private sector, which is indicator 25.000 ha per year.

Seedling production and transportation

Clonal acacia propagations are cutting at Kbal Chhay nursery and transported to planting stations.

Tree planting implementation on degraded forest land sites

Meanok Station is being implemented planting project this year (2010), which has planting areas around 4.000 ha.

Maintenance – replanting previous plantation from year 1 to year 5

Maintenance – replanting of FA planting site such as: clearing, thinning, patrolling. In 2010, this existing plantation is around 6,077 ha. The works such as maintenance and replanting are very important in this plantation.

Maintenance – replanting previous plantation from year 1 to year 5 (Continued)

Clearing in hybrid acacia plantation, which planted in 2008

Growing trees, aged 2 years.

National Arbor day Ceremony on 09 July 2010

The total of planting trees in this ceremony was 66 ha which was 104,734 seedlings; and delivered to people around 14,880 seedlings. There were people about 20,445 participating in this ceremony of Nation Arbor day.

2-The tree planting cooperation between private companies, communities and individuals.

- Small private sectors / families and NGOs: planted on 844 ha
- Economic land concession: planted tree , rubber, are clearing forest land and planted on 15,537 ha.
- Forest Administration is planted 823 ha
- The planting in 9 months at the early of 2010 as follows:
 - Planting mixed trees and rubber on 17,204 ha.

Partners' Planting activities between FA – private companies

Eucalyptus K7 plantation, aged 3 years, Taben Station, planting in partnership.

Private Company Plantations

Private company plantations at Kompong Thom and Steung Treng

Rubber plantation by Private company

This picture is rubber plantation by private company at Mudulkiri province

3-Research, Trial and Development of Genetic Resources

- Research on species that suitable to site planting
- Improve of tree planting on the poor site
- Trial testing on mix local species and exotic species
- Development of seed sources to supply tree planting program.

៥២ The trial of *Dalbergia Cochinchinensis* Pierre at

Kbal Chhay Promotion and Rehabilitation forest station,
Sihanouk province

Trial has shown that:

- *Dalbergia* tree grow well with acacia species, which will have treatment and shining when they reach 6-7 years.

Improvement of poor site tree planting

Eucalyptus K7 species has been researched and found that it is a commercial species. The trial has been done with the use of limited fertilizers at Meanok Station plantation. As a result, this species has grown rapidly and uniformed.

4- Next Activities:

- Stimulate and encourage the planting activities all over Cambodia on next 2011
- Cooperate and provide service to private sectors, communities, to expand planting
- Continue to improve the quality of genetic species
- Promote the result of trial, species and planting techniques
- Expand planting partners and private sectors in the forest land
- Exchange experience on plantation management state land, private and communities
- Research the market and help facilitate

5-Recommendation:

- Create work mechanism between government, private and community
- Provide budget on the research, techniques, and markets
- Establish procedures on forest products of private sectors, communities, and individual, for wood transportation, processing, and export.

Thank You!
